

Write a program which will find all such numbers which are divisible by 7 but are not a multiple of 5, between 2000 and 3200(both included). The numbers obtained should be printed in a comma-seperated sequence on a single line

```
In [ ]: n=[]  
        for x in range(2000, 3201):  
            if((x%7==0) and ((x%5)!=0)):  
                n.append(str(x))
```

```
In [3]: print(','.join(n))
```

```
